

You demanded superior comfort and vision performance from your contact lenses....

# We heard you.

We've extended our Biofinity® range so that now almost everyone can have access to the latest soft contact lens technology regardless of extreme vision needs.

2002 1st Material Generation

Wetting agents needed

Non-flexible & stiff

2004 2nd Material Generation

Wetting agents needed

Flexible and less stiff

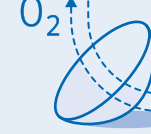

2008 3rd Material Generation

Naturally Wettable

More flexible & comfortable

High oxygen transmissibility

2013 3rd Generation extended

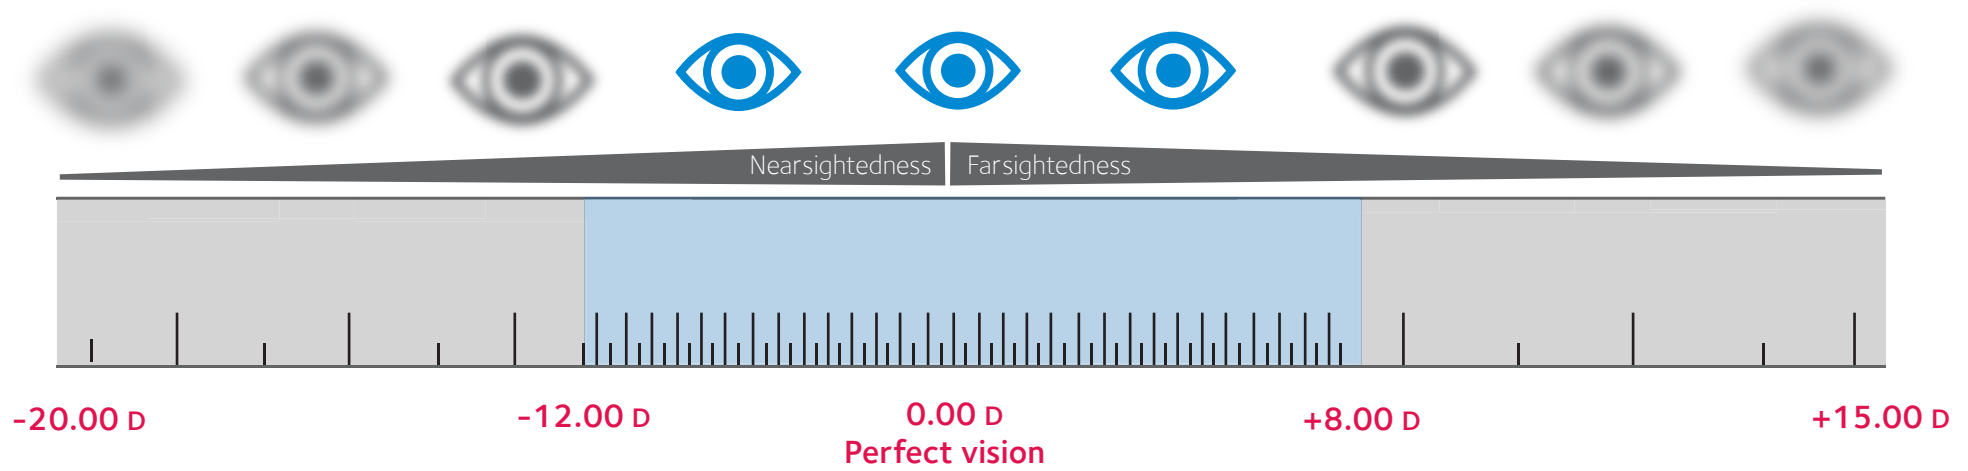

XR NEW

Extended Range contact lenses

Through Aquaform® Technology, Biofinity® XR provides third generation silicone hydrogel material benefits to a broader range of prescriptions and patients.

→ Silicone hydrogel lenses haven't been widely available for all prescriptions

**Diopter Strength:** Used to determine the level of magnification, or "power" needed to compensate for near- or far- sightedness.

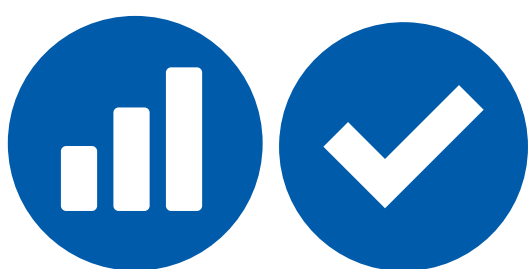

People who suffer from extreme near- and farsightedness haven't had the same convenient access to the latest contact lens technology

→ Until now, with Biofinity® XR contact lenses

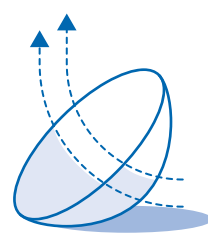

Biofinity® XR (extended range) contact lenses are the first line of silicone hydrogel contact lenses from a major manufacturer that accommodates individuals who require a diopter strength beyond -12.00D and +8.00D powers.

Now, almost everyone can have access to comfortable lenses regardless of extreme vision needs

Over the past 12 months, Biofinity® gained the greatest number of wearers versus any other major brand. USA study; data on file.

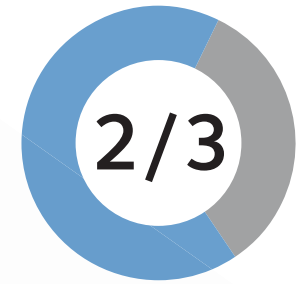

Breathability

Comfort

Features of Aquaform® Technology work together to create a comfortable, high-performing contact lens.

Two-thirds of Biofinity® lens wearers rate Biofinity as better or much better than other lenses. 2013 study; data on file.
