

# Biomedics® 55 Evolution

It is a monthly disposable contact lens that utilises the Aberration Neutralising System™ to provide clear, crisp vision across the power range. At the same time, rounded edge design minimised eye lid and lens interaction for improved wearing comfort.

- Improved wearing comfort
- Clear and Crisp Vision
- UV blocking\*

\* Warning UV absorbing contact lenses are not substitute for protective UV absorbing eyewear, such as UV- absorbing goggles or sunglasses, as they do not completely cover the eye and surrounding area. Patients should continue to use UV-absorbing eyewear as directed

CooperVision™

# Enjoy Clear, Crisp and Comfortable Vision
