SERVO-U
THE NEW POWER OF YOU**

SERVO-U THE NEW POWER OF YOU

SERVO-U MULTIPLE OPTIONS FOR PROTECTIVE VENTILATION

SERVO-U™ delivers many effective options for protective ventilation. All of them more accessible, understandable and easy to implement. Which means more patients in all phases of ventilation – controlled, supported, non-invasive and during spontaneous breathing trials – can benefit from advanced lung protective strategies. Welcome to the new power of you.

- Tools to support protective ventilation strategies, such as ARDSNet and NAVA®
- Context-based guidance, therapeutic workflows and intuitive user interaction for all functions
- Upgradeable platform that grows with your needs

SERVO-U INSPIRING CONFIDENCE

SERVO-U makes ventilation easier and more accessible, enhancing user confidence in tailoring treatments to the individual patient condition. Its highly intuitive touch screen provides easy access to support tools such as context-based views, dialogues, recommendations and prompts, with shortcuts.

- Track spontaneous breathing efforts and support sedation management in all modes with accurate onscreen information
- New step-by-step NAVA therapeutic workflow
- Onboard state-of-the-art media library allows you to record actual events as they are happening
- Choose the screen layout that suits the workflow best: standard views with loops or curves, advanced views and distance or family views
- Enhanced ergonomic design for the care environment

SECURING YOUR INVESTMENT

SERVO-U is a modular system you can configure with the features that best serve your patients now. When those needs change or as future functionality becomes available, you can upgrade easily and cost-effectively.

- Interchangeable hardware modules and components means the same feature can be used on different SERVO ventilators.
- MCare Portal lets you monitor and assess your fleet through one convenient hub while continuously providing access to the latest news and documentation.
