

“Wow! I’ve never seen like this before.”

“Duette lenses help me keep my eye on the ball and now I’m knocking it out of the park!”

Imagine walking outside and everything looks clearer and sharper than you’ve ever seen it before. Transform your vision with Duette contact lenses: advanced technology, high-performance lenses to help you achieve better vision, even if you have astigmatism.

And they’re designed especially for people who need to meet the uncompromising vision demands of their profession or lifestyle.

The “Wow” Money Back Guarantee.

If you don’t say, “WOW, this is the most incredible vision I’ve ever had,” we’ll refund the cost of your Duette lenses*. No hassles. No questions asked.

“Duette lenses give me the vision I need to bring a high level of precision to my surgical procedures.”

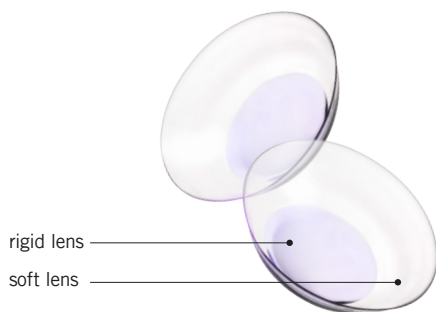

A high-tech approach to high-performance vision.

Duette combines two types of contact lens materials into one unique Duette lens.

The center of the lens is made of a rigid material to give you great, stable vision. The soft skirt keeps the lenses comfortable throughout the day.

No other contact lens uses the dual material design to provide clear vision and comfort in a single lens.

Plus, Duette lenses are personalized for your eyes to give you the great vision you deserve.

Why choose Duette lenses?

- Great vision
- Consistently stable vision
- All-day comfort
- A lens personalized for you

Duette is the right lens for people who want high-performance vision.

Are you ready for better vision?

1. Would you like your vision to be stable throughout the day?
2. Would you like great vision?
3. Do your profession, hobbies, or active lifestyle require crisp vision?
4. Are you interested in upgrading to advanced technology to improve your vision?

If you answered “yes” to one or more questions, ask your eye care professional about Duette contact lenses today!
